

Data Visualization Lab 5

Name: MOHAMMAD DANIYAL USMAN

ROLL NUMBER: BSDSF24A025

J1. Strongest YoY gross profit growth in fiscal Q2 of FY2025?

The **Online channel** had the strongest growth at **32.4%**. This makes sense because more people are shopping online now.

J2. Largest negative variance to budget in latest closed month?

The **South region** was **9.7% below budget** in December 2025. The Furniture category did especially bad there.

J3. Highest rolling 12-month sales at end of 2025?

Electronics had the highest with **\$7.2M**. Laptops and phones are selling really well.

J4. Online channel percentage by year?

- 2022: 21%
- 2023: 25%
- 2024: 29%
- 2025: 32%

Online keeps growing every year.

J5. Consumer segment YTD vs prior YTD?

Current YTD: **\$5.4M**

Prior YTD: **\$4.6M**

Growth: **+17.4%** (better than company average)

Other Things I Noticed**Sales Trends**

- November-December = 29% of yearly sales (holiday shopping)
- February is always slow (12% below average)
- Sales keep going up every year

Budget Stuff

- We're 5.7% above budget overall (good!)
- Budget accuracy got better over time:
 - 2022: off by 8.4%

- 2025: off by only 3.6%

Best & Worst

- Best category: Electronics
- Best channel: Online
- Best region: East
- Worst region: South (needs help)
- Wholesale channel growing slow

What to Fix

- South region Furniture sales
- February slow month (maybe run promotions)
- Wholesale channel strategy

That's all my findings from the data!
